Motivated and detail-oriented Full Stack Developer with knowledge of MERN Stack technologies including MongoDB, Express.js, React.js, and Node.js. Completed a Bachelor's degree in Information Technology from GLS University and currently pursuing a Master's degree in IT at Silver Oak University. Alongside academics, actively enhancing practical development skills through professional training in Full Stack Programming. Passionate about web development, problem-solving, and building user-friendly applications while continuously learning new technologies and industry best practices.

Profile Summary

- I am a Full Stack Developer with a strong interest in web application development and modern technologies. I have completed my Bachelor's degree in Information Technology from GLS University and am currently pursuing a Master's degree in Information Technology at Silver Oak University. My academic journey has helped me build a solid foundation in programming, database management, and software development.

- To strengthen my practical skills, I joined Frameboxx and completed training in Full Stack Programming. Through this training and various projects, I have gained hands-on experience with HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, and MongoDB. I enjoy creating responsive and user-friendly web applications and continuously improving my technical knowledge.

- I am a quick learner, a team player, and passionate about solving real-world problems through technology. I am looking for an opportunity where I can apply my skills, contribute to meaningful projects, and continue growing as a software developer while learning from experienced professionals.

Core Competencies

Full Stack Web Development	Backend Development	React.js Development
MERN Stack Development	UI/UX Design	
Frontend Development	JavaScript Development	

Technical Skills

- Frontend Development: HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), React.js
- Backend Development: Node.js, Express.js, REST API Development
- Database Technologies: MongoDB, MySQL
- UI/UX Design: Figma, Adobe XD, Canva, Photopea, Icons8, Prototyping
- CMS & Website Builders: WordPress
- Programming Languages: JavaScript, Python (Basic)
- Version Control & Collaboration: Git, GitHub
- Development Tools: Visual Studio Code, Postman, XAMPP, npm, ChatGPT, Gemini, OpenCode, Codex
- Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (Basic), Responsive Web Design, Software Development Life
- Cycle (SDLC), Computer Networking (CN)

Education

- Silver Oak University, Ahmedabad, Gujarat
  Master of Science (M.Sc.) in Information Technology | 2025 – Parsuing

- GLS University, Ahmedabad, Gujarat
  Bachelor of Science (B.Sc.) in Information Technology | 2021 – 2024

- Xavier High School, Ahmedabad, Gujarat
  Higher Secondary Education (12th Grade) | Gujarat Board
  Secondary Education (10th Grade) | Gujarat Board

Soft Skills

- Leadership & Team Collaboration
- Problem-Solving & Analytical Thinking
- Time Management & Ownership
- Communication & Stakeholder Management
- Adaptability & Continuous Learning

Projects

Car Rental Website | React.js, Bootstra

- Developed a responsive car rental website using React.js and Bootstrap.
- Designed and implemented interactive user interfaces for vehicle browsing and rental services.
- Created reusable React components to improve maintainability and scalability.
- Built pages for self-drive rentals, rentals with drivers, and vehicle listing sections.
- Ensured a seamless user experience through responsive design and optimized layouts across devices.

Education Management System | MERN Stack

- Developed a comprehensive education management platform using React.js, Node.js, Express.js, and MongoDB.
- Built role-based modules including Super Admin, Counselor, Student, Finance, and Academic Management.
- Implemented features for student management, fee tracking, attendance, course management, and reporting.
- Designed responsive dashboards and integrated frontend and backend functionalities for efficient data management.
- Enhanced user experience through dynamic forms, secure data handling, and streamlined administrative workflows.

SecureLife Insurance Policy Management System | MERN Stack

- Developed a comprehensive insurance policy management platform using React.js, Node.js, Express.js, and MongoDB with separate Admin and Customer workflows.
- Implemented role-based authentication and authorization using JWT, allowing administrators to manage users, customers, insurance companies, policies, and renewal activities.
- Built insurance policy management features supporting multiple policy types including Health, Life, Auto, Home, Travel, Fire, Retirement, Personal Accident, Two-Wheeler, Shopkeeper, Burglary, and Workman Compensation Insurance.
- Developed customer and policy management modules with functionalities for creating, updating, deleting, searching, tracking policy status, premium, coverage, start dates, and expiry dates.
- Implemented insurance company management, allowing administrators to add companies, define supported policy types, manage company information, and associate companies with customer policies.
- Created a policy renewal management system that identifies expiring policies, displays remaining days, and allows administrators to send renewal or new-plan suggestions to customers.
- Implemented bulk CSV data management for users, customers, companies, and policies, including CSV templates, file uploads, validation, duplicate handling, and detailed import error reporting.
- Designed responsive and interactive Admin and Customer dashboards using React Bootstrap, React Icons, Framer Motion, and reusable dashboard components.
- Developed secure backend REST APIs with Express.js and Mongoose, including protected routes, admin authorization middleware, data validation, and MongoDB database integration.
- Implemented password security using bcrypt hashing and JWT-based authentication for secure user sessions and protected API access.
- Added customer features for applying for insurance policies, viewing personal policies, managing profiles, and responding to renewal suggestions.
- Integrated dynamic statistics and dashboard widgets to display information such as total users, customers, companies, policies, and active policies.
- Improved user experience with responsive UI, animations, toast notifications, theme switching, reusable components, dynamic forms, and interactive data management workflows.

Online Examination System | MERN Stack | Deployed Project

- Developed and deployed a comprehensive Online Examination Platform for Silver Oak University using React.js, Node.js, Express.js, and MongoDB.
- Implemented role-based access control with three roles: Super Admin, Admin, and Student, using JWT authentication and protected routes.
- Built Super Admin modules for managing courses, subjects, administrators, semester allocation, subject assignments, and system statistics.
- Developed Admin functionality for student management, exam creation, question management, bulk question uploads, exam scheduling, result-date management, and student submissions.
- Implemented Student features including registration/login, course and subject access, exam schedules, online MCQ examinations, practical coding exams, result viewing, and assignment/file submission.
- Added a practical coding examination module with an online code editor, multiple programming-language support, code execution, output comparison, automated evaluation, and submission tracking.
- Implemented AI-assisted code evaluation and plagiarism detection to analyze programming submissions and identify similarities between student solutions.
- Added bulk data management, CSV result export, email notifications/reminders, result notifications, and exam submission management for efficient administration.
- Designed responsive dashboards with React, reusable components, authentication context, theme support, dynamic forms, notifications, animations, and mobile-friendly layouts.
- Built RESTful backend APIs with Express.js and Mongoose, integrating MongoDB for users, courses, subjects, exams, questions, and submissions.
- Deployed and made the project publicly accessible: Live Project :— https://online-examination-sou.pages.dev/

Personal Details

Dateof Birth: 1st April 2004 | Languages Known: English, Hindi, Gujarati | Address: Ahmedabad, Gujarat
